Barcode Software For Code

Barcode Software for Code is a software application specialized in creating barcodes. It gives you the possibility to generate Code 11, Code 128, Code 32, Code 39, Code 93, as well as other types of barcodes. User interface You are welcomed by a clean design that allows you to preview the barcode directly in the main window. A help manual is included in the package in case you do not manage to set up the dedicated parameters on your own. Barcode customization options Barcode Software for Code allows you to choose the barcode type from a drop-down list, insert barcode data, as well as embed custom text. What's more, you can change the resolution, place the barcode characters to different locations, and show or hide text on/from the barcode. The application helps you change the colors of the bars, alter the background color,

modify the text in terms of font, font style, and size, as well as resize and rotate the barcode to different angles. When it comes to exporting options, you may print or save the barcode to TIF, BMP, JPG, PNG, PDF, EMF, or EPS file format. The barcodes can also be copied to the clipboard so you can transfer them into other programs. Tests have pointed out that Barcode Software for Code carries out a task quickly and delivers very good output results. It remains light on system resources so the overall performance of the computer is not affected. Label settings Barcode Software for Code offers you the freedom to choose between several label types, set up the barcode alignment on the label (horizontal and vertical position), print data starting with a custom column, specify the number of labels to print, configure sheet margins, adjust the size of the label, add a background image for the label, as well as automatically adjust the

barcode height if the barcode is taller than the label. Final words All things considered, Barcode Software for Code comes packed with several handy features for helping you design custom barcodes, and can be configured by rookies and professionals alike. You might also like: OCR Software is a lightweight tool used for converting text images to Word document text. It can be used to recognize text from any file format, including Adobe PDF, Excel, CSV, HTML, JPG, PNG, RTF, and Word document. The software is able to perform OCR for many different languages,
